PROFESSIONAL SUMMARY

Azure-certified IT professional with experience in system validation, troubleshooting, and SLA-driven operational support. Hands-on exposure to Azure infrastructure including Virtual Machines, VNets, Network Security Groups, RBAC, and Azure Monitor in Infrastructure-as-a-Service (IaaS) environments. Currently preparing for Microsoft Azure Administrator (AZ-104) certification to further develop cloud administration and infrastructure management expertise.

TECHNICAL SKILLS

Azure: Virtual Machines, VNets, Subnets, NSG, Azure AD (RBAC), Storage, Azure Monitor, Azure Backup, Azure Resource Manager (ARM)
Cloud Ops: Azure Networking, Deployment, Monitoring, Backup & Recovery, Identity & Access Management (IAM), Troubleshooting
Tools: Linux, Git, GitHub Actions, Selenium, Jira, SQL, Basic CI/CD

PROJECTS

Azure Infrastructure Deployment
- Deployed Azure Virtual Machines and configured secure access using **RBAC and Azure Portal**
- Designed **Azure VNets, subnets, and Network Security Groups (NSG)** for secure network configuration
- Implemented RBAC roles using Azure AD to manage identity and permissions

Azure Monitoring & Backup Simulation
- Monitored Azure resources using **Azure Monitor to track performance, availability, and resource health**
- Configured backup and recovery processes to ensure data protection
- Identified and resolved connectivity, performance, and resource utilization issues

WORK EXPIERENCE

Quality Assurance Associate – Picnic GmbH, Berlin **2025**
- Supported system validation and ensured operational stability in production environments
- Identified workflow inefficiencies and contributed to faster issue resolution
- Collaborated with teams to maintain performance, reliability, and SLA compliance

Warehouse Operations Associate – Amazon, Berlin **2024–2025**
- Worked in a high-volume, SLA-driven operational environment
- Reported system-related issues impacting workflow efficiency
- Maintained accuracy and performance under strict operational targets

Working Student – Software Development & Testing – BHT University, Berlin **2023–2024**
- Executed 500+ test cases and supported debugging of application-level issues
- Assisted in system improvements during software migration projects
- Maintained documentation and tracked defects to support development teams

Software Tester – Hexaware Technologies, India **2022–2023**
- Developed and maintained 200+ Selenium automation scripts, increasing test coverage by 40%
- Improved system reliability and reduced execution time through automation
- Supported validation processes within CI/CD environments

EDUCATION

Master in IT Management – Berlin School of Business and Innovation, Berlin **2022 – 2024**
Bachelor of Computer Science and Engineering – Anna University, India **2017 – 2021**

CERTIFICATION

- Microsoft Azure Fundamentals (AZ-900)
- Microsoft Azure Administrator (AZ-104) – Exam Scheduled (March 2026)
