PROFESSIONAL SUMMARY

IT Support professional with experience in system support, software testing, and SLA-driven operations. Microsoft Azure Certified (AZ-900) and preparing for AZ-104. Strong in troubleshooting, Linux environments, and incident resolution with a focus on operational stability.

TECHNICAL SKILLS

Cloud: Azure (VMs, VNets, NSG, RBAC), Azure Monitor, Azure Backup
Systems: IT Support, Troubleshooting, Incident Management, Linux (Ubuntu), Windows
Tools: Selenium, Jira, Git, GitHub Actions (basic), SQL
Operations: System Monitoring, Root Cause Analysis, SLA Compliance, Technical Documentation

PROFESSIONAL EXPERIENCE

Quality Assurance Associate – Picnic GmbH, Berlin **2025**

- Conducted system audits and validation testing for issue resolution
- Identified workflow issues and supported SLA compliance
- Collaborated with cross-functional teams to improve operational efficiency

Warehouse Operations Associate – Amazon, Berlin **2024–2025**

- Worked in a high-performance, SLA-driven environment meeting daily targets
- Reported system-related issues to improve operational efficiency
- Maintained accuracy and productivity under strict deadlines

Working Student – BHT University, Berlin **2023–2024**

- Executed 500+ test cases to validate system functionality and stability
- Supported debugging and system improvements
- Maintained documentation and tracked defects efficiently

Software Tester – Hexaware Technologies, India **2022–2023**

- Developed 200+ Selenium automation scripts to enhance testing efficiency
- Increased test coverage by 40% through automation optimization
- Performed functional and regression testing to ensure software quality

PROJECTS

Azure Virtual Network Deployment & Security Configuration

- Designed and deployed virtual networks with subnets and Network Security Groups
- Configured virtual machines and validated secure connectivity
- Implemented Role-Based Access Control (RBAC) for secure resource management

Automated Testing Framework using Selenium

- Built an automation framework for functional and regression testing
- Developed reusable test scripts to improve testing efficiency
- Reduced manual testing effort and improved testing accuracy

EDUCATION

Master of Science (M.Sc.) IT Management – Berlin School of Business and Innovation **2022-2024**
Bachelor of Computer Science and Engineering – Anna University **2017–2021**
